

Step 1: How to Enable Two-Step Verification in Gmail?

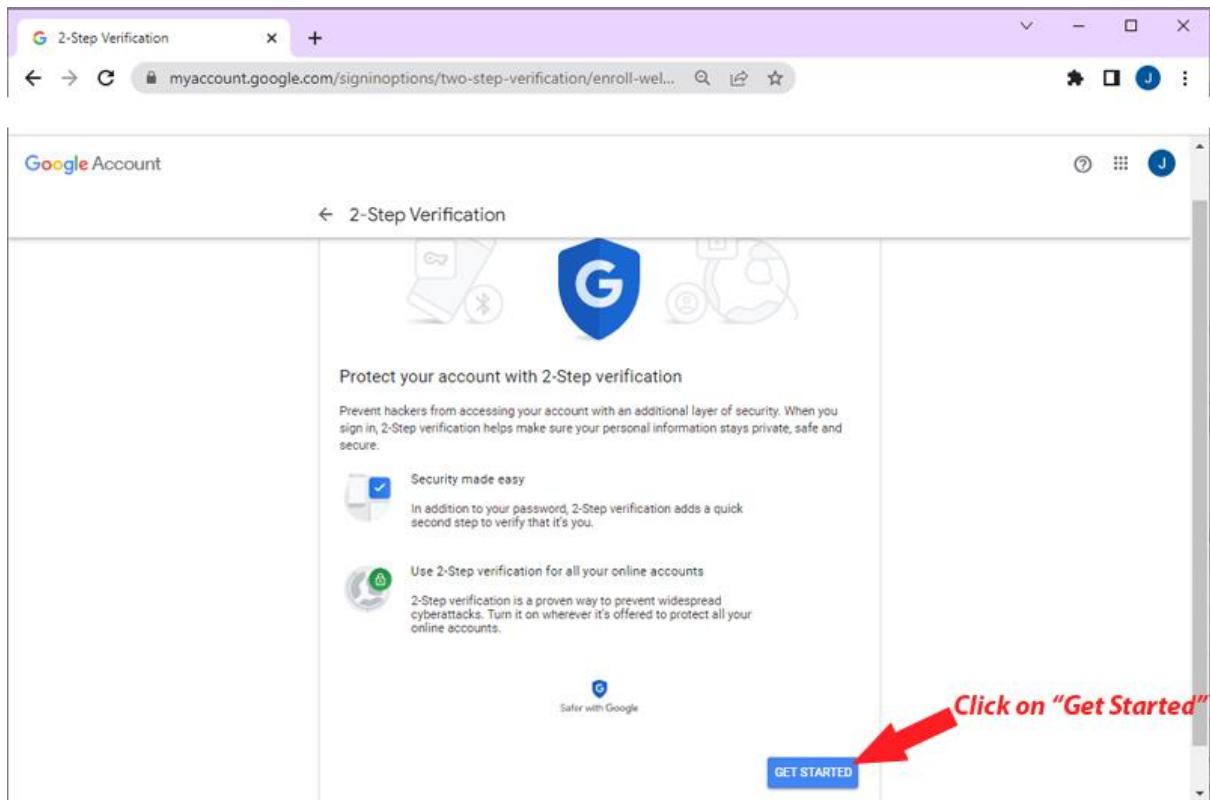

- Open your web browser and log in with your **Gmail** account.
- Click on your Gmail profile icon and then click on “**Manage your Google account**”.

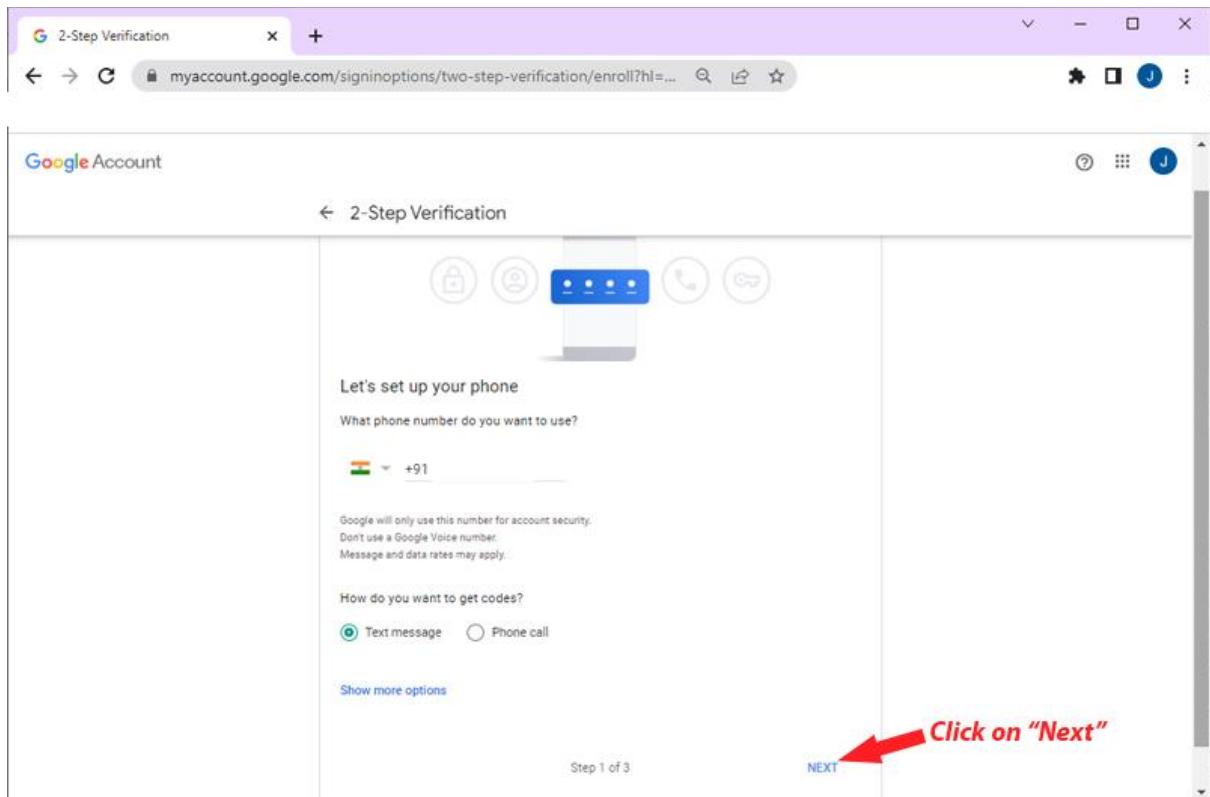

- Select the “**Security**” tab, then click on **2-Step Verification** and enable it.

A screenshot of the Google Account security settings page. The URL in the address bar is 'myaccount.google.com/security?hl=en'. On the left, a navigation menu lists 'Home', 'Personal info', 'Data & privacy', 'Security' (which is highlighted with a red arrow), 'People & sharing', 'Payments & subscriptions', and 'About'. The main content area is titled 'Signing in to Google' and includes sections for 'Password', 'Use your phone to sign in', and '2-Step Verification'. A red arrow points to the '2-Step Verification' section, where a toggle switch is shown as being turned off. Below this, there is a section titled 'Ways we can verify it's you' with icons for a smartphone, a key, and an envelope.

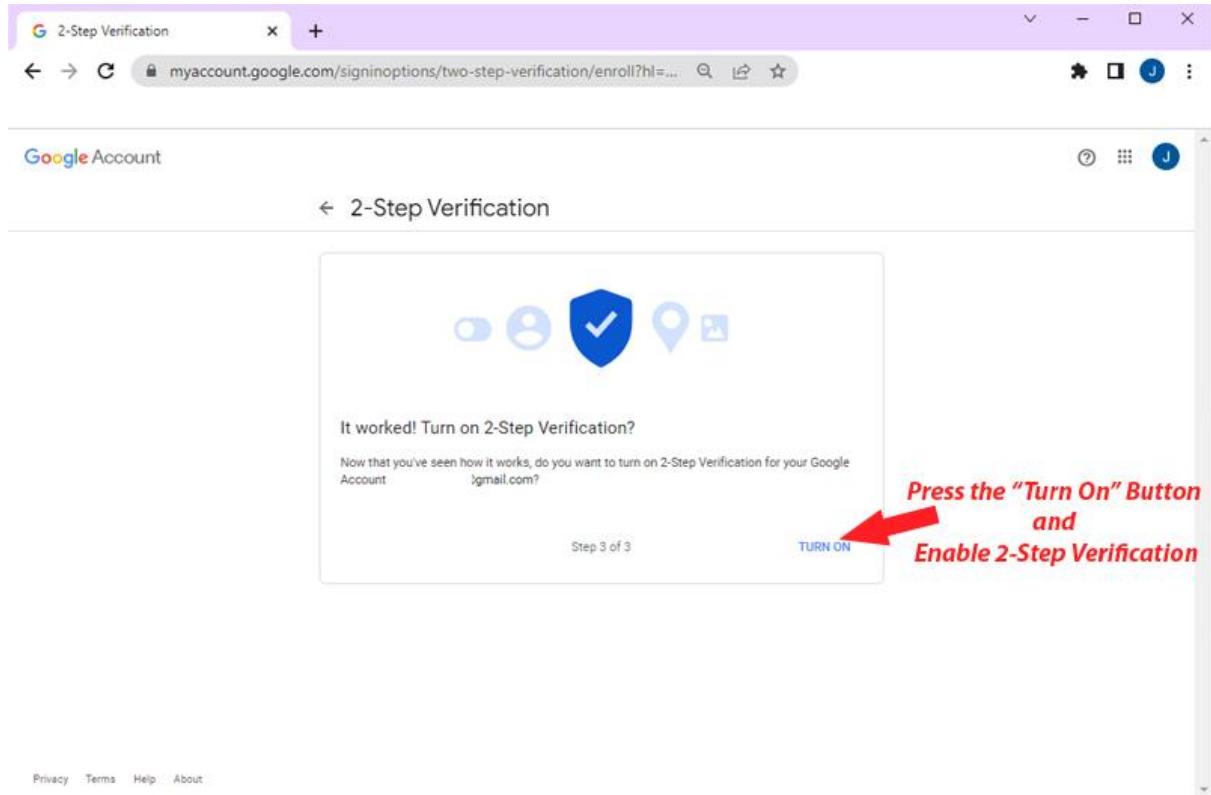

- Click on the **Get Started** button and then hit on **Try it now**.

- Enter your mobile number and choose the **“Text message”** or **“Phone call”** option.

- Click on **Send** and get the verification code from Google.
- Enter the **verification code** and hit the **Next** button.
- Press the **Turn On** button from the next screen.

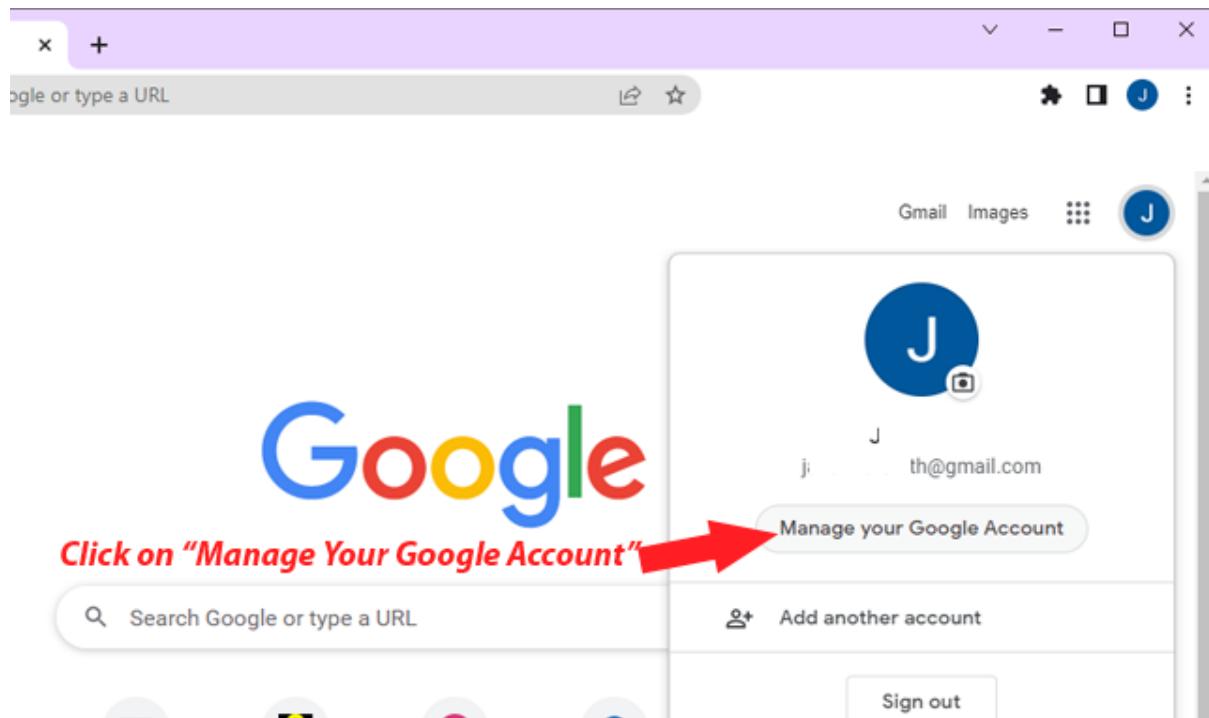

You have successfully enabled two-step verification in your Google account. Now you need to generate your Google third-party app password. Simply complete this job, by following the next step shown below.

Step 2: – How to Create Google App Password for Third-party apps login?

Note: – For generating a Google app password first enable 2-steps verification by applying the above-mentioned step.

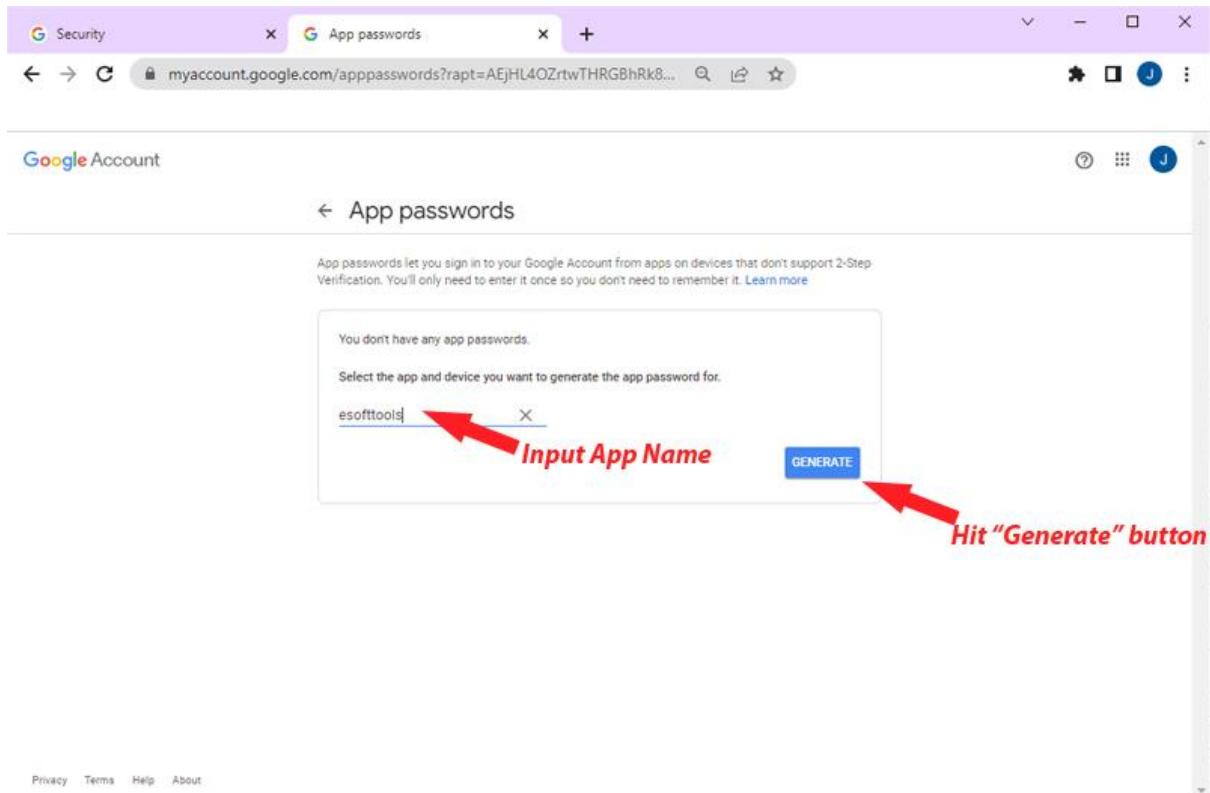

- Open **Google** in your web browser and log in with your **Google/Gmail account**.
- Click on the **profile icon** and then hit on the **Manage your Google account** option.

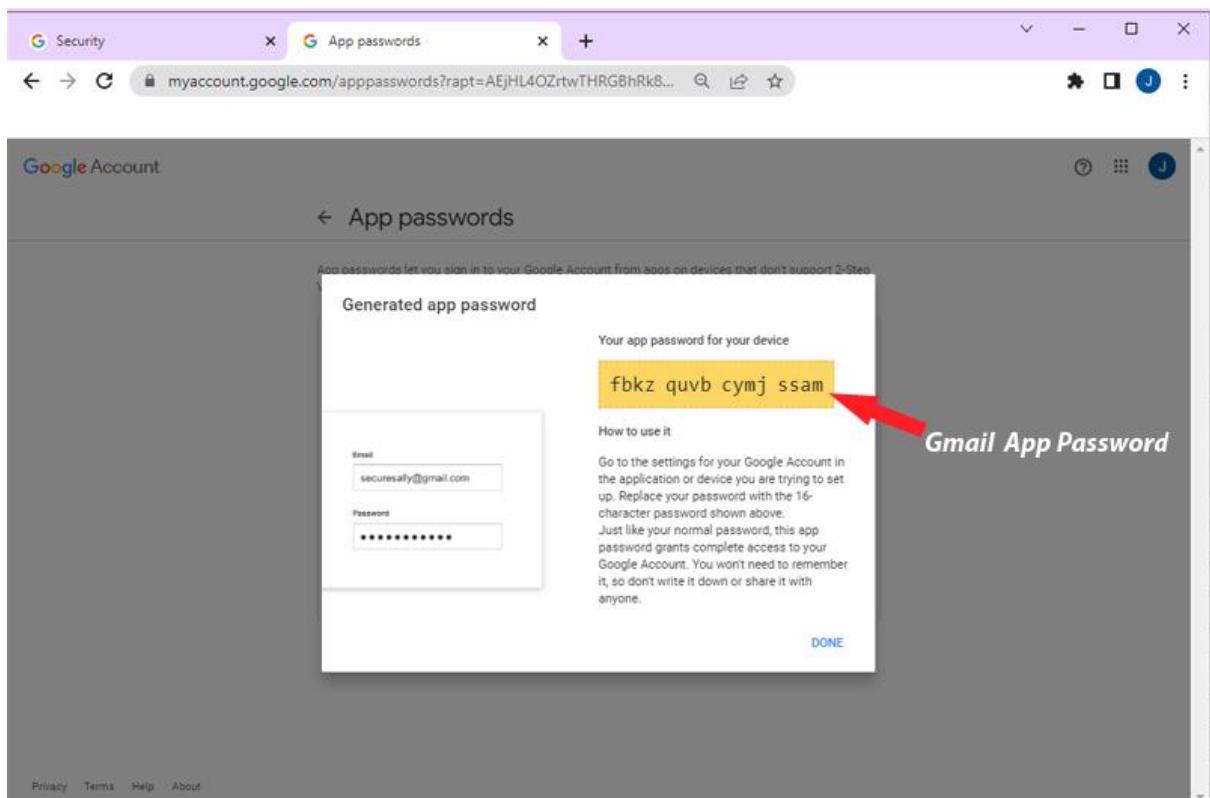

- Hit on the “Security” tab and then click on the App passwords area.

A screenshot of a web browser showing the Google Security settings page. The URL bar says 'myaccount.google.com/security?rapt=AEJHL4Nvi4dU_KNxt43kKGCBhF...'. The left sidebar has a 'Security' tab highlighted with a red arrow and the text 'Click on "Security" Tab'. The main area shows sections for 'Signing in to Google', 'Ways we can verify it's you', 'Your devices', and 'Third-party apps with account access'. A red arrow points to the 'App passwords' section in the 'Signing in to Google' area with the text 'Select "App Password" option'.

- Select and Enter the App type and device and click on “Generate”.

- Get your **Google app password** with **16 digits key**, simply copy it.

- After copying this third-party app password, click on “**Done**”.
